

Deepanshu Jain

deepanshujain848@gmail.com | +91 7891563035 | LinkedIn | Github | Leetcode | Medium

Skills

Frontend: iOS (Swift, Objective-C, UIKit, CoreData, GCD), React Native(Typescript, Redux, Context API)

Tools: Xcode, VScode, Github, Firebase, Postman, Azure DevOps, JIRA, OKTA

Miscellaneous: Multi-threading, SOLID, Design Patterns, OOPS, MVC, MVVM, VIPER, REST APIs, JSON

Experience

Software Engineer, MRI Software – Vadodara Sep 2023 – Present

- Spearheaded a phased iOS app rollout, reducing production issues by **40%** through controlled releases, real-time monitoring, and iterative improvements.
- Developed an efficient **logging mechanism** significantly reducing the time to diagnose up to **70%**.
- Improved **session handling** by bypassing redundant authentication for active sessions and implemented **session-refresh** that auto-renews sessions if app usage occurs within a month, reducing repeated logins by **90%**.
- Integrated **OAuth authentication (Okta)** to improve security and allows **100%** user authentication coverage in **5 regions** and **15+** user selected environments.
- Automated **CI/CD** with **Azure DevOps** and **Expo** Updates, reducing manual build efforts by **80%**.
- Reduce response time by **50%** by implementing **Parallel API** and **Retry mechanism** to improve reliability.
- Integrated **Pendo** to capture user **behavior analytics** and provide in-app guides for new feature releases, improving user onboarding completion by **30%**.
- Collaborated with product and design teams to gather requirements and propose feasible solutions.

Software Engineer, In time tec – Jaipur Feb 2022 – Sep 2023

- Maintained iOS SDK for **Fraud prevention** with real-time data collection to improve the security of applications.
- Enabled integration flexibility with **100%** coverage using Static Library, XCFramework, SPM and CocoaPods.
- Built Xamarin and .NET bindings using **Objective-C Sharpie**, increasing cross-platform usage by **12%**.
- Composed **6+** integration guides for customer teams, reducing implementation time and support needs.

Projects

MRI Rent Payment - 70K+ Downloads [Link] Jan 2025 - Present

- Implemented **multi-factor authentication (MFA)** in compliance with **PCI Guidelines** to strengthen security.
- Enhance **duplicate payment** detection logic, allowing a variation of $\pm 5\%$ threshold to improve accuracy.

Checkpoint ID - 10K+ Downloads [Link] Jun 2024 - Present

- Integrated **Dive SDK** to scan **2D / MRZ codes** on government-issued IDs in real time verification.
- Provided mobile app support to boost sales by **10-20%** developing a responsive UI for both mobile and tablets.
- Designed responsive UI layout optimized for mobile and tablet devices, supporting portrait and landscape mode.

PMX OTG: MRI Property Management - 1K+ Downloads [Link] Sep 2023 - Present

- Implemented **Multi-threaded Image Compression** techniques to increase API response time by **30%**.
- Created **Commercial Financial Dashboards** used by **1000+ users**, reducing the resolution of tenant queries.
- Enabled **Offline Support** via **Realm**, improving data access reliability with **70%** uptime during no-network.
- Enhance UI experience using **throttling** and **debouncing** techniques, improving performance by **40%**.
- Implemented **image caching** to prevent redundant downloads, improve loading speed and user experience.

Education

Rajasthan Technical University, BTech in Computer Science - 7.96 CGPA Aug 2018 – Jun 2022

Achievement

Received the **Core Value Award** from MRI Software for exemplary contributions. Nov 2024
